

## AQS Data Certification – Planned Fixes and Enhancements

As of April 8, 2013

### Pending Issues/Problems

Component	Issue Description
PM Report	PM 2.5 monitors with multiple methods for year are always marked as not meeting PQAO-Level certification criteria.
Cover Page	Certifying Agencies are marked on the report cover page under the column heading “PQAO Selections” instead of being labeled “Certifying
PM & Lead Reports	For sites where the Collocated Precision data was submitted via RP transactions and where there is no Monitor Collocation defined for the site, the collocated precision check does not show up on the report.
Routine Data Completeness	Certification report presently using completeness from Annual Summaries, which may be NAAQS completeness rather than sampling completeness.

### Completed/Fixed Issues
